

Anodizing Lines

Amsax supplies **Anodizing Lines** to a wide range of customers serving the Aerospace Construction, Consumer and Electronic Industries. We supply **Automated Anodizing Lines** and **Manual Anodizing Lines** that can be upgraded to Automatic Lines in the future. Our Automatic Lines feature **WinHoist**™, our in house control software. **WinHoist**™ has full data acquisition and documentation capabilities. Our robust **Anodizing Lines** are built rugged to stand up to the demands of the Industrial Environment.

Amsax has engineered, built and delivered all types of **Anodizing Lines** including Semi-bright, Bright, Architectural, Semi-hard and Hard Chromic and Sulfuric Lines. Amsax also supplies dyeing, sealing and multi-colored Anodizing for a variety of metals including aluminum and titanium. Amsax uses only top quality materials and equipment in our **Anodizing Lines**. We provide a custom engineered solution to meet your individual requirements. Amsax won't cut corners and will engineer your line so it operates reliably with the flexibility to meet your current and future production demands.

- **Anodizing Lines** for a variety of applications and metals including aluminum and titanium.
- Modular design allows for the addition of carriers and tanks in the future.
- Amsax **Anodizing Lines** are custom engineered to meet your unique requirements. No part or application is too large or complex.
- Contact-free carrier positioning system features an absolute linear encoder for precise positioning and trouble free operation.
- Amsax **Anodizing Lines** have Full Data Capture capabilities for high end NADCAP compliance.
- Environmentally friendly design minimizes chemical and water consumption.
- Simplicity for maintainability and easy operator access.
