

Continuous Process Lines

Amsax supplies **Continuous Process Lines** to a wide range of customers serving the Transportation, Telecommunication and Utility Industries. Our **Continuous Process Lines** are built tough for *Real World* Industrial Environments. Our tanks and trays are fabricated from Co-polymer European Gray Polypropylene and Heavy Gauge 316 Grade Stainless Steel according to the process or vapor exposure. We customize our designs to meet your individual requirements. Amsax won't cut corners and will engineer your line so it operates reliably with the flexibility to meet your current and future production demands.

- Process Lines include electroless and electrolytic processes as well as continuous heat treatment lines.
- Flexible modular design allows for the line to be optimized meeting your unique requirements.
- Process Lines can be engineered to process a single strand or up to 60 wires.
- Process Lines can be set up inline with a wire drawer or as a stand alone line with payoffs and take-ups.
- Environmentally friendly design minimizes chemical and water consumption.
- Simplicity for maintainability and easy operator access.
